

*Erecting the poles using a block and tackle. The pulley may be attached to an overhanging tree, if convenient. For maximum embedment strength, use wooden skids as shown to prevent damage to the walls of the hole.*

*Erecting the poles using a truck. With the tip of the pole resting on the tailgate, the truck slowly backs up, angling the pole upward. Use skids to prevent damage to the edge of the hole, and guide ropes to control the pole as it goes up.*
